

OPTILENO: 30-DAY SPRINT TO \$200+ MRR

A Step-by-Step Operator Blueprint for \$2,400+ ARR | Audience: Solo Agencies & Developers

1. The Growth Mathematics & Conversion Benchmarks

To reach and exceed **\$200/month MRR** (or \$300+ upfront cash), Optileno leverages a high-value blended tier structure (\$19/mo or **\$12,999/yr**).

Target Metric	Subscribers Needed	Unit Price	Resulting Revenue
Option A (Monthly Subscriptions)	11 Users	\$19 / month	\$209 / mo MRR
Option B (Annual Cash Flow Boost)	2 Users	\$12,999 / \$155 yr	\$310 Instant Cash
Option C (Blended 30-Day Target)	6 Monthly + 1 Annual	Blended	\$269 Total Revenue

Funnel Targets: 5,000 Unique Visitors → 300 Free Signups (6%) → 60 Active Daily Users (20%) → **11-15 Paid Ultra Users (18-25%)**.

2. Optileno's Architectural Moat & Value Proposition

Unlike generic task checklists, Optileno is engineered specifically to prevent cognitive fatigue for technical solo operators.

- **Interactive Calendar & 1-Click Sync:** 18-hour continuous planner with Day/Week toggles, 1-click Google Calendar event generation, and downloadable RFC-5545 .ics feeds for Outlook/Apple Calendar.
- **Intentional Human-in-the-Loop AI:** Unlike Motion's disruptive auto-rescheduling that shuffles meetings without context, Optileno drafts high-precision schedules and asks for 1-click user confirmation.
- **Dual AI Brain with Instant Failover:** Meta Llama 3.3 70B via NVIDIA NIM with sub-300ms failover to Groq for zero downtime.
- **Big Five & Burnout Telemetry:** Calibrates schedule intensity to psychological stamina and alerts you before cognitive fatigue leads to burnout.
- **Free Lead-Gen Tools:** Public AI Task Prioritizer and Weekly Planner for organic search and viral Reddit acquisition.
- **Fact-Checked Competitive Pricing:** \$19/mo with zero annual lock-in (vs Motion's \$34/mo monthly) and ~\$12.90/mo on annual (vs Sunsama's \$20/mo).

3. Day-by-Day 30-Day Execution Blueprint

Phase 1: Days 1 to 7 — Technical Launch & Free Lead Magnets
